

CLEANER SEPARATORS

QUALITY HANDLING EQUIPMENT

EasyClean™ Separator

PU Coil Cleaner

Star Cleaner

Steel Coil Cleaner

Tong Engineering offers a wide range of efficient crop cleaning equipment to take care of your valuable crop

An integral component of Tong vegetable grading lines is a dry cleaner separator to remove soil, clod and haulm from the crop for more accurate & efficient grading.

Tong's new generation EasyClean separator is the market's only cleaning separator with electric direct drive motors on every shaft, ensuring ultimate cleaning control, gentle handling of crop and guaranteeing minimal maintenance. Tong's range of cleaners also includes the latest PU coil cleaner as well as more traditional cleaning systems like our steel coil and star cleaners. All Tong cleaners can be specified to suit your exact requirements as well as various crop and cleaning conditions, and are suitable for use on a wide variety of crop including potatoes, carrots, onions, beetroot and parsnips. With over 85 years experience in engineering excellence, Tong Engineering prides itself on manufacturing crop cleaning equipment which is reliably strong yet gently efficient.

CLEANER SPECIFICATION DATA

Tong EasyClean™ Separator

Manufactured in a range of widths from 900mm to 2400mm with remote control box as standard.

- EasyClean™ available in 4, 6, 8 or 10 row models
- Direct drive on every shaft via electric motor & inverter
- Height adjustable stainless steel clod rollers, direction & speed controlled in pairs
- Option of HMI touch screen control giving instant & automatic adjustment to pre-set programs for different crop & weather conditions for ultimate ease of use.

Steel Coil Cleaner

Designed as an efficient cleaning system suitable for light soil conditions, which can also be fitted after an EasyClean™ system for sizing out smaller crop between 15mm to 55mm

- Standard models of 4, 6 or 8 rows of coils
- Available as fixed or adjustable coils with easy adjustment mechanism for interchanging gap between coils
- Inverter variable speed

PU Coil Cleaner

Similar to steel coils but manufactured using soft, durable PU coils for gentle removal of stone, clod and haulm. Like steel coils, this cleaner can also be fitted after an EasyClean™ system for sizing out smaller crop

- Standard models of 4, 6 or 8 rows of coils
- Available as fixed or adjustable coils with easy adjustment mechanism for interchanging gap between coils
- Inverter variable speed

Star Cleaner

Tong's star cleaner is manufactured with either 14 or 18 fingered PU stars for efficient and gentle soil and clod removal.

- Available in standard models of 4, 6 or 8 rows of 14 or 18 fingered stars
- Inverter variable speed motors
- Popular cleaner for light soil conditions
- Can be fitted with a VertiCam system for efficient self-cleaning of stars
