

easy CLEAN

Unrivalled cleaning in all conditions

The Tong EasyClean separator offers truly unmatched crop cleaning performance and control.

With Inverter Direct Drive motors on every shaft, the EasyClean has full electric Blue-Inverter control with a proven track record since its launch as the Caretaker's new generation cleaner over 5 years ago. The latest models of the Caretaker are fitted with an even more refined, cartridge-style model, the EasyClean II. With the capability to be even more finely tuned, our knowledge and experience allows us to offer the most effective separator on the market, for dependable performance whatever the weather.

MARKET LEADING EasyFill Box Filler

If you're looking for a high throughput box filler that is built to offer reliable performance under the most demanding situations, look no further than Tong's market-leading EasyFill box filler. Available in Mini, Midi, Maxi or Mega models to suit all box sizes, the EasyFill range offers gentle and effective box filling from 30 to 70 tonnes per hour.

THE GENTLEST HANDLING MINIMAL MAINTENANCE

The EasyFill's trademark 'Doorstop' belt sets the Tong box filler apart from the rest. This unique belt carefully cradles crop, meaning no drops and no curtain hoods.

With minimal mechanical parts and linear actuator controlled lowering arms, the EasyFill ensures smooth transfer of crop and exceptionally low maintenance.

THE CARETAKER

Leading the way...

All sizes. All throughputs

SELECT YOUR CLEANER

Take your pick of the market's leading cleaners to suit your requirements. From the high performance EasyClean to stars and coils. The choice is yours.

TAILOR YOUR DESIGN

Our expert engineers take your specific requirements, however large or small, and design a Caretaker that is configured to meet every one of them.

TONG

Handling Innovation

Integrated Optical Sorting

Take your Caretaker capabilities to the next level.

Tong is proud to offer a new and advanced option on all Caretaker graders, to integrate accurate optical sorting on dirty crop, for the effective removal of stones and debris without the need for manual sorting and inspection. Our market leading grader, with market leading technology, to reduce costs and improve consistency.

Next Generation Grading

EXPERIENCE HANDLING INNOVATION

Tong's unique and intelligent Pro-Series control interface can be specified as part of the popular auto-touch HMI control system, offering a number of advanced and highly-proactive features that have been designed to ensure ease of control, minimal downtime and the best performance.

Advanced Control

Auto-Touch HMI Control

Instant & automatic cleaner and Caretaker control at your fingertips

Blue Inverter Technology

The very best energy efficiency with Inverter Variable Speed Direct Drive

Intelligent Diagnostics

E-Stop Alerts

Know when emergency stop buttons have been activated and their exact location

Real-Time Notifications

Receive notifications of any areas for attention as and when they happen

Proactive Maintenance

Maintenance Scheduling

Get accurate info on the run time of components, for proactive maintenance scheduling

Continuous Reporting

Regular reporting on machine status gives high level operator intelligence at all times

Upgraded Features

Multi-Camera Monitoring

Easy and instant viewing of multiple areas of the Caretaker, allowing machine status checks from one central location.

Trailer Reversing Sensors

Your hopper loading co-pilot! A popular option for making trailer reversing quicker, safer, easier and more accurate.

LED Inspection Lighting

Fitted as standard, LED energy efficient lighting offers enhanced visibility, for better picking-off capabilities and improved working conditions.
