

TPS-PRO POLISHER

NEW GENERATION, VIRTUALLY MAINTENANCE-FREE POLISHING

Fitted with a **unique drive system with electric direct drive inside every shaft**, the TPS-Pro Polisher offers a **virtually maintenance free, efficient and reliable** polishing system

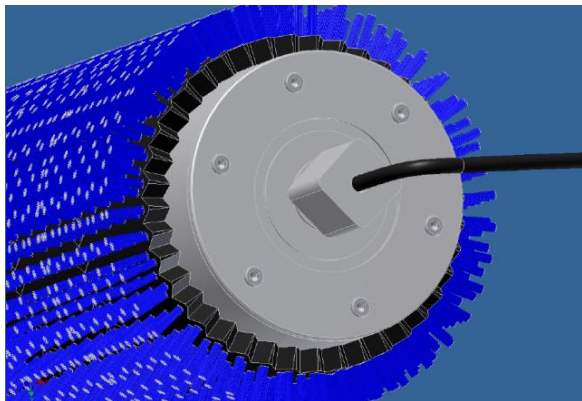

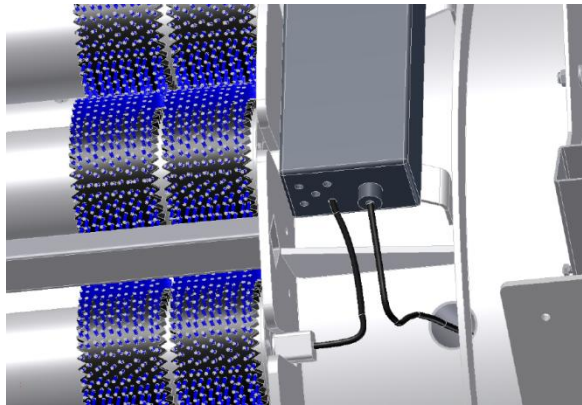

Designed with the latest technological advances in mind, the TPS-Pro polisher has been specifically designed to feature electric direct drive inside every shaft, with self-contained stainless steel motors within their own oil baths, and waterproof sealed bearings. These key features virtually remove the need for equipment maintenance or lubrication, providing exceptional labour efficiency.

VIRTUALLY MAINTENANCE-FREE DESIGN

The TPS-Pro polisher is fitted with a revolutionary drive system that is built with gold-plated contact points for optimum longevity and efficiency. Unlike conventional polishers, the TPS-Pro polisher is driven by internally sealed drum motors which are completely immersed in high temperature resistant, food-grade oil, which not only eliminates rust or corrosion within the system, but also ensures reliable performance, as well as fast and easy brush exchange. With no complicated external drive or motor arrangements, which are normally exposed to the elements associated with polishing, the TPS-Pro polisher runs exceptionally efficiently and quietly, for optimum polishing results.

Manufactured with the highest levels of flexibility in mind, the TPS-Pro polisher can be used on a variety of crop from potatoes and carrots to parsnips and beetroot. So, to meet the demands of your buyers, why not upgrade to Tong's most efficient polishing system ever - TPS-Pro polisher, for a reliable and exceptionally low maintenance machine that ensures a top quality crop finish.

TPS-PRO POLISHER SPECIFICATION DATA

Technically advanced oil-bathed electric direct drive system inside every shaft:

- 2 Year Warranty*
- Exceptional Stainless Steel build quality
- Minimal maintenance with self contained stainless steel inverter direct driven motors inside every shaft
- Each motor is contained in its own high temperature resistant, food-grade oil bath
- Waterproof sealed bearings
- Gold-plated contact points for optimum longevity and efficiency
- Water spray bar for high quality polishing
- Electric control panel
- Optional air-bag system, water recycling system, bypass system, filter elevator & recirculation pump

Standard Models:

- **12 brush model** – 2.5m long x 800mm wide barrel – 10-12 tonnes per hour
- **14 brush model** – 3m long x 800mm wide barrel – 15-20 tonnes per hour
- **18 brush model** – 3.5m long x 1050mm wide barrel – 25-30 tonnes per hour

The TPS-Pro Polisher is suitable for use on:

- Potatoes
- Carrots
- Parsnips
- Turnips & Swedes
- Beetroot

* 1 year Warranty on motors only
