

U-BRUSH POLISHER

ECONOMICAL, EFFECTIVE & LOW MAINTENANCE POLISHING

Tong's U-Brush polisher offers an efficient and cost effective vegetable polishing system that's suitable for a wide range of root crop with throughputs up to 8 tonnes per hour

Whether you're looking for an affordable carrot polisher, or you need a polisher for your potatoes, parsnips, beetroot or pumpkins, Tong's U-Brush polisher offers an economical polishing system that is suitable for throughputs up to 8 tonnes per hour.

Featuring longitudinal polishing brushes that rotate on fixed-centre shafts, the U-Brush polisher is gentle on crop whilst giving a high quality polished appearance. With a choice of 8 or 10 brushes to suit your throughput requirements, the U-Brush polisher can be built in mild or stainless steel and is a budget polishing machine that offers a high-value polished finish that is characteristic of larger vegetable polishers, but at a lower cost for lower capacities.

So, if you're looking to add a polisher into your vegetable handling processes but you are not looking to invest in a large polishing machine, the U-Brush polisher could be just what you need.

U-BRUSH POLISHER SPECIFICATION DATA

Affordable, effective and low maintenance vegetable polishing:

- Simple low cost maintenance
- Capacity up to 6 tons per hour
- Same crop finish as a rotary polisher
- Longitudinal brushes
- Water spray bar
- 2 Variable speed motors via inverter
- Adjustable angle design
- 8 or 10 row models
- Mild steel or stainless steel construction

Unique Bypass System:

- Centre conveyor through polisher
- Crop feeds onto the conveyor
- With the ploughs closed the crop passes straight over the conveyor bypassing the polisher
- With the ploughs open the crop then diverts onto the polisher and is brushed
- Feed off chute is adjustable in angle to either gently drop the crop onto the next machine in line or to be out of the way when in polishing mode
- Mild steel or stainless steel construction

Water recirculation options:

- Water tank with 100mm emptying valve
- Either manual filter or filter conveyor with powered cleaning brush to remove debris
- Recirculation pump
- Mild steel or stainless steel construction

The U-Brush Polisher is suitable for use on:

Potatoes, Carrots, Parsnips, Turnips & Swedes, Beetroot, Pumpkins & more!
