

Paddock Cleaners

The cost-effective way to clean and maintain paddock areas, ensuring good animal health.

Nicholson Paddock Cleaners are keeping paddocks clean across the world. Breeders, leisure owners, and collegiate programs have found that the simple, robust design is the ideal solution to paddock maintenance.

The Nicholson Paddock Cleaner fits virtually any tractor and its quiet operation disturbs neither horses nor neighbors. It is driven via the tractor's PTO pump, using one spool. Variable, but accurate depth control sets the ground driven roller in front of the powered, long life nylon brush. Droppings, wood, stones, and trash are grabbed and safely deposited into the hopper. Weekly use over the summer removes parasites before they hatch. Once full, the hopper is lifted on its hydraulic arms and tipped to discharge its contents.

The machine cleans grass up to 4 inches without rakes engaged and up to 8 inches with rakes engaged. The rakes provide light scarifying, removing weeds and trash, to rejuvenate the paddock. Used regularly, the Nicholson Paddock Cleaner will enhance paddocks with a striped effect.

Suitable for tractors over 17HP

- ❑ Low Power Requirements
- ❑ Simple, Versatile Operation
- ❑ Robust Construction
- ❑ Low Noise Level

Paddock Cleaner Specifications

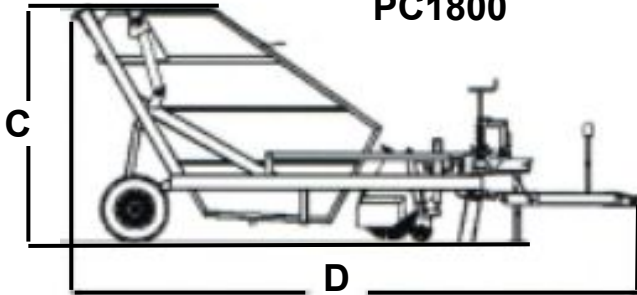

PC900

PC900

Type	Trailed
Drive	PTO Pump
Performance	5 MPH
Tractor	17-40 HP
Tipping Height	6 Feet
Overall Length (A)	12 Feet
Overall Height (B)	6 Feet

PC1800

PC1800

Type	Trailed
Drive	PTO Pump
Performance	7 Acres per Hour
Tractor	35-45 HP
Tipping Height	6 Feet
Overall Length (D)	14.5 Feet
Overall Height (C)	6 Feet

PTO pump driven brush creates a smooth, non-stop operation.

Front-mounted rakes tackle weed and trash while ground driven lead roller flattened molehills, and traps droppings onto the brush.

Hydraulic lift arms raise hopper to 6 feet during tipping.
